

CS 4223-01 Project Checkpoint #1
Fall 2019

Due: September 19 at class time

Assignment

Make a list of all the tokens of Slic. For each token, give a regular expression that defines its syntax and a name suitable for a macro name in a C program. Write the name in all uppercase characters.

What to Turn In

Submit your solution to Canvas in text (.txt) format double spaced. Be sure to include your own name at the beginning of the document.
