

CS 4223-01 Project Checkpoint #6

Fall 2019

Due: November 7 at class time.

Assignment

Enhance your Slic parser so that it correctly **parses assignment statements**. Include semantic code to build an abstract syntax tree and a **code generator** to produce executable GSTAL code that correctly implements the semantics of the Slic program.

What to Turn In

Zip your source code files, including the *makefile*, and turn them in via Canvas by class time on the due date.
